EDGE Global Supply Completes the Purchase of RK Distribuzione S.r.l.

Expands EDGE coverage with Rockwell Automation across Northern Italy

EDGE Global Supply, through its subsidiary Technology BSA, completed the acquisition of RK Distribuzione as of December 31, 2019.

RK is an industrial automation and electrical products distributor and is the authorized Rockwell Automation distributor in the Triveneto region of Northeast Italy. RK is headquartered in Verona and its capabilities are very similar to that of BSA, founded on highly qualified technical expertise and excellent customer support for machinery builders.

Says Fabio Biamino, BSA Managing Director, “The RK operation places us among the leading players of the Italian automation market with global sales of around € 50 million. As BSA, RK is Authorized Distributor and Market Maker of the Rockwell Automation brand. This establishes us as the largest distributor of that brand in Italy, covering the North of Italy with offices located in Piedmont, Lombardy, Veneto, Friuli Venezia Giulia and Trentino Alto Adige”

According to Bob Eisenbrown, President and CEO of EDGE, “This agreement underlines our success after only two years from the BSA acquisition and is a natural expansion of our business.”

EDGE is a Limited Liability Corporation developed and owned by a group of North American based distributor members. The focus of EDGE is to build a network of distribution company partners outside of North America. The members of EDGE are French Gerleman Electric Company, Gerrie Electric Wholesale International Inc., Horizon Solutions LLC, Kendall Electric Inc., Kirby Risk Corporation, McNaughton-McKay Electric Company, Revere Electric Supply Company, The Reynolds Company, Van Meter Industrial Inc. and Werner Electric Supply Company.

Technology BSA is an EDGE subsidiary with headquarters in San Marzano Oliveto (AT) - Piedmont.
